 This table lists bills and policies actively advocated for or against and cases litigated on or for which amici briefs were submitted during 2021 that some organizations participating in the 2021 RJ Impact evaluation reported they worked on and deemed relevant to the reproductive justice movement. For these organizations, “advocating for or against” involved activities that included community organizing, drafting bills, providing public comment, public education campaigns, serving on advisory committees for legislation, and other tactics. **Reporting this information was an entirely voluntary part of the survey, and this list is not inclusive of all of the organizations, nor all of the Groundswell grantees, who worked on these policies. Indeed, many others worked on these same bills.** However incomplete, this list does give a sense for the breadth of policy work accomplished by RJ movements, and for that valuable reason we have chosen to include it with the reporting.
